

**Attendance**

There is a big focus by the Department of Education about attendance in schools. They would like to see all students above 95% in attendance. That is an average of one day a fortnight.

The current school attendance rate is 92.2%.

- There are three students below 80%.
- There are seventeen students between 80-90% attendance.
- There are eight students will 100%.

This data is taken from the end of Week 3, Term 2.

**Roofing**

The B Block roof is about to be removed and a new metal roof will be installed. As a school we will move classes around for the two weeks required for this to happen. Kindergarten will move to the Mathematics Resource Room, Year 3 & 4 to the Library and Year 5 & 6 to Kindergarten. There will be building fencing up so there will be no access to the building during this time. We do not need a generator, one will now be supplied for the whole school.

**Blocks for Drama**

Very expensive to cover and repair at \$220 per block. Looking at what it costs to buy brand new ones.

**Playground**

I spoke with Greg Owens about the playground and that we are willing to go ahead. He has since sent a further email about the height to be signed off from AMU (Assets) before he can say go ahead. I have not signed the paperwork, I am waiting on AMU to get back to me.

**Cricket**

Students will start cricket skills this Friday and it will continue until the end of term.

**Musica Viva**

I understand that the school usually asks the P&C for money. I have covered this from the school, using a drama grant fund to help subsidise.
